Department of Electronics and Communication Engineering

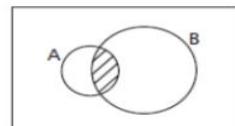

UEC301 – Information and Communication Theory

Tutorial - 1

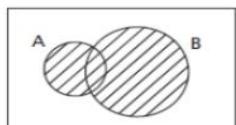

- Q1** In the experiment of rolling of dice, find the
- probability of rolling a one
 - probability of rolling a one or a six
 - probability of rolling an even number
- Q2** A card is drawn from a standard deck of 52 cards. Find the probability that it is
- a heart or a face card.
 - a jack or an ace card
 - a 10 or a spade
- Q3** If two standard dice are rolled. What is the probability that the total of two dice is less than 6?
- Q4** Write down the notation for the shaded area in terms of events A and B

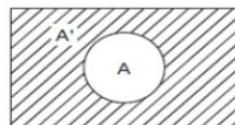

(a)

(b)

(c)

(d)

- Q5** In a rolling of dice experiment if event A is defined as occurrence of face one and event B is defined as occurrence of odd faces and event C is defined as occurrence of even faces. Find the probability of
- event A
 - event B
 - intersection of event A and B
 - union of event A and B
 - intersection of event B and C
 - union of event B and C
 - union of event A and C
